

## Voluntary Incident Response Form

The Joint Loss Management Committee (JLMC) reviews these incident reports to try to identify possible hazards in an attempt to keep us all safer. With that in mind, please be as thorough and specific as possible when filling out this report so the committee can weigh and evaluate safety concerns.

The following are completely voluntary but we would appreciate you taking the time to answer if you are comfortable doing so:

Was this an isolated incident or has something like this happened before? If so, how often?

Do you think this incident could have been avoided with more training or resources? What kind?

Could anything be done differently that might help keep incidents like this from reoccurring?

Is there anything else you feel the committee might find helpful?

Thank you for your time and input, we hope you feel better soon

JLMC
